

Why Renew Your Membership in ICCAC

The Social Work and Allied Mental Health Professionals Committee

Advanced cardiac therapies do not exist in isolation. Psychosocial perspectives remain essential to addressing identity, mental health, caregivers, ethics, and long-term quality of life in MCS care.

Continued psychosocial membership strengthens representation across the full continuum of care and helps prevent these perspectives from becoming fragmented or underrepresented within broader MCS conversations.

A strong psychosocial presence strengthens the field.

Renewal builds influence, connection, and progress

As ICCAC grows, active psychosocial membership helps expand mentorship opportunities, increase research collaboration, inform best practice guidelines, maintain awareness of regulatory changes, and strengthen representation at national and international conferences.

Renewing your membership supports shared learning, advocacy, and sustained psychosocial influence in advanced cardiac care.

Thank you for continuing to be part of this work.

Continue your psychosocial impact within a professional community committed to collaboration, leadership, and lasting influence. Visit iccac.global to renew.
